CLOTH FACE MASKS CSM1000

At Propel, we usually spend our time developing innovative solutions for customers such as the US Navy, US Army, US Air Force and US Marines. In response to the COVID-19 pandemic we have reacted at light speed to leverage our deep knowledge of textile technology and the US textile industry to develop a comfortable, quick-drying, launderable cloth face mask.

Our goal was a great product at a fair price. From concept to production took 5 days, including developing the all-important aluminum nose stay. We are now producing our masks in multiple US factories, sourcing US-made textiles and components from our home state of Rhode Island and across the country.

Available in white, we are adding navy blue, black and tan as soon as we can. We are working hard to have inventory on hand, but right now masks are selling even before they hit the shelf.

We are serving the need for cloth masks for individuals, families, employees and employers everywhere, as well as the US Military and our valued First Responders. Our first order was from the Newport, RI Fire Department and we are proud to say that within a week they reordered.

*You may use this face mask when face masks approved for medical purposes are unavailable. Although the FDA has not specifically cleared or approved our masks, the FDA has authorized their use under an Emergency Use Authorization for use by health care practitioners to help prevent the spread of infection or illness in healthcare settings and by the general public to help slow the spread of the virus during the COVID-19 pandemic.**

BODY CONTACT MATERIALS ON THIS MASK INCLUDE: KNIT ELASTIC, 100% POLYESTER THREAD, AND 100% NYLON KNIT FABRIC. MACHINE WASH OR HAND WASH, HOT WATER AND SOAP. LINE DRY OR TUMBLE DRY. NOT FLAME RESISTANT.

Propel, LLC, 999 Main Street, Unit 106, Pawtucket, RI 02860
propel-llc.com

Propel LLC, is a woman-owned small business, focused on product innovation, development, sales and marketing of textile driven technology and products for the First Responder and US Military markets.

**This authorization continues while circumstances exist justifying the authorization of emergency use of medical devices, including alternative products used as medical devices, during the COVID-19 outbreak, under section 564(b)(1) of the Food, Drug and Cosmetic Act, 21 U.S.C. § 360bbb-3(b)(1), unless FDA terminates or revokes the emergency authorization at an earlier date.*
